

With its leading technology solutions and comprehensive services, Conemaugh Health System delivers the highest caliber in patient care.

State-of-the-Art Technology

- **da Vinci Robotic Assisted Surgery** is being used for general, gynecological, thoracic, colorectal, urology and weight loss surgery.
- A **Electrophysiology Laboratory** for diagnosis and treatment of abnormal heart rhythm conditions.
- The **Robot Rx-3000HP Pharmacy System** uses barcode scanning technology to automate the storage, picking, returning, restocking and crediting of more than 90% of our daily unit dose medications.
- **Philips Hybrid OR** with AlluraClarity. The room uses special green lighting to enhance vision, allowing surgeons to perform a full range of procedures using the latest in x-ray technology – which provides high quality imaging with ultra-low radiation dose levels.
- Conemaugh Memorial offers the only **Fetal Echocardiography Lab** between Pittsburgh and Harrisburg accredited by the Intersocietal Commission for the Accreditation of Echocardiography Laboratories.
- State-of-the-art low-dose **Computed Tomography (CT)** scanner offers patients CT scans which are faster and may offer up to an 80% reduction in radiation.
- Only **Epilepsy Monitoring Unit** between Pittsburgh and Harrisburg.
- **Digital 3D Mammography** at six sites offers women excellent image quality while at the same time minimizing radiation dose.

Other technology includes:

- Hyperbaric Oxygen Chamber
- Telestroke
- LINX - Surgical procedure for treating heartburn
- Transcatheter Aortic Valve Replacement (TAVR)
- Conemaugh Connect Electronic Medical Record System
- Open MRI
